

Deck Restoration and New Deck Installations

As our summer exterior pest control services begin to wind down in early fall several of our service staff begin new projects such as deck repairs, replacements and installs. Which have become annual jobs we complete for interested clients.

For other clients their decks are solid, sound structures but they require a new look to the exterior surface. We offer cleaning and re-staining services for clients not interest about completing themselves.

Contact us today if you are interested in meeting, to discuss a project in further detail.
